Overview

Identification

COUNTRY

Namibia

EVALUATION TITLE

Livestock

EVALUATION TYPE

Independent Performance Evaluation

ID NUMBER

DDI-MCC-NAM-MCC-AG3-2017

Version

VERSION DESCRIPTION

Not applicable to this evaluation; no quantitative data to be shared

Overview

ABSTRACT

The evaluation assessed five criteria defined by the Organisation of Economic Co-operation and Development/Development Assistance Committee (OECD/DAC): relevance, efficiency, effectiveness, impact and sustainability. Specific questions were defined for each criterion. The evaluation took the form of a Real Time Evaluation (RTE), meaning that it was carried out while the Activity was in full implementation and fed back its findings to the management for immediate use. RTE is an iterative process of regular evaluation missions that follow, assess and document implementation progress based on document review and triangulation with field observations and interviews.

EVALUATION METHODOLOGY

Other (Performance Evaluation)

UNITS OF ANALYSIS

Sub-activity and grant

MCC Compact and Program

COMPACT OR THRESHOLD

Namibia Compact

PROGRAM

The Compact between the Millennium Challenge Corporation and the Government of Namibia was signed in 2008. The goal of the Compact was to promote economic development and reduce poverty in Namibia through three program components: education, agriculture, and tourism. The Livestock Activity within the Agriculture Project aimed to improve animal health services and livestock marketing efficiencies in the north of the country, where approximately 60% of the population of Namibia live, including the majority of the poor.

MCC SECTOR

Agriculture and Irrigation (Ag & Irr)

PROGRAM LOGIC

The Livestock Support activity produced the following outputs: state veterinary offices (SVOs) constructed, Q-camps rehabilitated, cattle tagged and tracked, LMEF grant funds disbursed, and the establishment of a livestock traceability system. These outputs are expected to lead to improved livestock health and productivity, and increased international market access and formal livestock sales. In the long term, the expected overall impact is an increase in household income and reduction in rural poverty.

PROGRAM PARTICIPANTS

Livestock owners, organizations involved in livestock development
